PHYSICAL REVIEW B

THIRD SERIES, VOLUME 81, NUMBER 21

JUNE 2010-1(I)

|                                                                                                                                                                                                  |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
|  Compensated electron and hole pockets in an underdoped high- $T_c$ superconductor ( <i>17 pages</i> ) . . . . . | 214524 |
| Suchitra E. Sebastian, N. Harrison, P. A. Goddard, M. M. Altarawneh, C. H. Mielke, Ruixing Liang,<br>D. A. Bonn, W. N. Hardy, O. K. Andersen, and G. G. Lonzarich                                |        |
| Microscopic inhomogeneity and superconducting properties of a two-dimensional Hubbard model for high- $T_c$<br>cuprates ( <i>6 pages</i> ) . . . . .                                             | 214525 |
| Satoshi Okamoto and Thomas A. Maier                                                                                                                                                              |        |

ERRATA

|                                                                                                                                 |           |
|---------------------------------------------------------------------------------------------------------------------------------|-----------|
| Erratum: Diffusion of carbon in bcc Fe in the presence of Si [Phys. Rev. B <b>81</b> , 054116 (2010)] ( <i>1 page</i> ) . . . . | 219901(E) |
| D. Simonovic, C. K. Ande, A. I. Duff, F. Syahputra, and M. H. F. Sluiter                                                        |           |

|                                                                                                                                                                                              |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Evidence for multiple superconducting gaps in optimally doped $\text{BaFe}_{1.87}\text{Co}_{0.13}\text{As}_2$ from infrared spectroscopy (5 pages) .....                                     | 214508 |
| K. W. Kim, M. Rössle, A. Dubroka, V. K. Malik, T. Wolf, and C. Bernhard                                                                                                                      |        |
| Variational study of the neutron resonance mode in the cuprate superconductors (8 pages) .....                                                                                               | 214509 |
| Tao Li and Fan Yang                                                                                                                                                                          |        |
| Moisture-induced superconductivity in $\text{FeTe}_{0.8}\text{S}_{0.2}$ (5 pages) .....                                                                                                      | 214510 |
| Y. Mizuguchi, K. Deguchi, S. Tsuda, T. Yamaguchi, and Y. Takano                                                                                                                              |        |
| Ambegaokar-Baratoff relations for Josephson critical current in heterojunctions with multigap superconductors (6 pages) .....                                                                | 214511 |
| Yukihiro Ota, Noriyuki Nakai, Hiroki Nakamura, Masahiko Machida, Daisuke Inotani, Yoji Ohashi, Tomio Koyama, and Hideki Matsumoto                                                            |        |
| Density of states modulations from oxygen phonons in <i>d</i> -wave superconductors: Reconciling angle-resolved photoemission spectroscopy and scanning tunneling microscopy (9 pages) ..... | 214512 |
| S. Johnston and T. P. Devereaux                                                                                                                                                              |        |
| Exact results on the two-particle Green's function of a Bose-Einstein condensate (5 pages) .....                                                                                             | 214513 |
| Takafumi Kita                                                                                                                                                                                |        |
| Vortex matter in mesoscopic two-gap superconducting disks: Influence of Josephson and magnetic coupling (15 pages) .....                                                                     | 214514 |
| R. Geurts, M. V. Milošević, and F. M. Peeters                                                                                                                                                |        |
| Simultaneous measurement of torsional oscillations and NMR of very dilute $^3\text{He}$ in solid $^4\text{He}$ (5 pages) ....                                                                | 214515 |
| Ryo Toda, Patryk Gumann, Kei Kosaka, Masatomo Kanemoto, Wakana Onoe, and Yutaka Sasaki                                                                                                       |        |
| Majorana zero modes bound to a vortex line in a topological superconductor (7 pages) .....                                                                                                   | 214516 |
| Takahiro Fukui                                                                                                                                                                               |        |
| Effects of Tm substitution on superconductivity and magnetism in the antiferromagnetic borocarbide superconductor $\text{Dy}_{1-x}\text{Tm}_x\text{Ni}_2\text{B}_2\text{C}$ (6 pages) .....  | 214517 |
| Lingwei Li, Katsuhiko Nishimura, Masakazu Fujii, Kenji Matsuda, and Dexuan Huo                                                                                                               |        |
| Josephson effect in superconductor/ferromagnet structures with a complex weak-link region (13 pages) ....                                                                                    | 214518 |
| T. Yu. Karminskaya, A. A. Golubov, M. Yu. Kupriyanov, and A. S. Sidorenko                                                                                                                    |        |
| First-principles calculation of the electron-phonon coupling in ultrathin Pb superconductors: Suppression of the transition temperature by surface phonons (4 pages) .....                   | 214519 |
| Jesse Noffsinger and Marvin L. Cohen                                                                                                                                                         |        |
| Enhancement of superconducting fluctuation under the coexistence of a competing pseudogap state in $\text{Bi}_2\text{Sr}_{2-x}\text{R}_x\text{CuO}_y$ (5 pages) .....                        | 214520 |
| Y. Okada, Y. Kuzuya, T. Kawaguchi, and H. Ikuta                                                                                                                                              |        |
| Effect of pseudogap formation on the superconducting gap in underdoped cuprates (14 pages) .....                                                                                             | 214521 |
| E. Schachinger and J. P. Carbotte                                                                                                                                                            |        |
| <i>t</i> - <i>J</i> model of coupled $\text{Cu}_2\text{O}_5$ ladders in $\text{Sr}_{14-x}\text{Ca}_x\text{Cu}_{24}\text{O}_{41}$ (7 pages) .....                                             | 214522 |
| Krzysztof Wohlfeld, Andrzej M. Oleś, and George A. Sawatzky                                                                                                                                  |        |
| Growth of solid hcp $^4\text{He}$ from the superfluid (6 pages) .....                                                                                                                        | 214523 |
| M. W. Ray and R. B. Hallock                                                                                                                                                                  |        |
