

Errata

Erratum: Mixmaster cosmological model in theories of gravity with a quadratic Lagrangian [Phys. Rev. D 39, 2187 (1989)]

John D. Barrow and H. Sirousse-Zia

In Eq. (15) and the following equations the constant factor $4n$ should read $16n^2$. In Eqs. (34) and (53) — should read + in the exponent. In Eq. (43) $-\nu_i$ should read $+\nu_i$. In Eq. (53b) the second factor should read

$$\tau^{F'_2}.$$
