PACS number(s): 13.85.Ni, 13.88.+e, 14.40.Gx, 99.10.+g

The data points in Fig. 5 were displaced due to an error in the plotting routine. The corrected plot is shown here. Furthermore, the color singlet model prediction for the χ_{c1}/χ_{c2} ratio in a proton beam experiment (second column of Table III) should read 0.11.
