

Optimization of a nonlinear 1D feature, shown as contour lines, for a 2D non-Gaussian distribution. Inset: principal component analysis allows extraction of only a linear feature. [L. Sarra, A. Aiello, and F. Marquardt, Phys. Rev. Lett. **126**, 200601 (2021)]

Physics
spotlighting exceptional research

The American Physical Society's free online publication, *Physics* (physics.aps.org), provides thought-provoking analysis and spotlights exceptional research.
