

Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review A, Vol. 54, November 1996, Issue 5

Metastable states of antiprotonic helium in the energy range of the 2S and 2P states of helium: Hyperspherical analysis of the system	Oleg I. Tolstikhin, Shinichi Watanabe, and Michio Matsuzawa	R3705
Electron-impact ionization of laser-excited sodium atom	W. S. Tan, Z. Shi, C. H. Ying, and L. Vusković	R3710
Continuous observation of interference fringes from Bose condensates	J. I. Cirac, C. W. Gardiner, M. Naraschewski, and P. Zoller	R3714
Interference of two Bose-Einstein condensates with collisions	T. Wong, M. J. Collett, and D. F. Walls	R3718
Noncondensate atoms in a trapped Bose gas	Juha Javanainen	R3722
Properties of cold collisions of ^{39}K atoms and of ^{41}K atoms in relation to Bose-Einstein condensation	H. M. J. M. Boesten, J. M. Vogels, J. G. C. Tempelaars, and B. J. Verhaar	R3726
Observation of flux enhancement in collisions between ultracold atoms	V. Sanchez-Villicana, S. D. Gensemer, and P. L. Gould	R3730
Control-laser-induced subnatural linewidths and quenching of spontaneous emission	G. S. Agarwal	R3734
Conditional probabilities for a single photon at a beam splitter	K. Jacobs and P. L. Knight	R3738
Second-harmonic generation and the orbital angular momentum of light	K. Dholakia, N. B. Simpson, M. J. Padgett, and L. Allen	R3742
Anharmonicity of the vacuum Rabi peaks in a many-atom system	J. Gripp, S. L. Mielke, L. A. Orozco, and H. J. Carmichael	R3746
Quantum Zeno effect on atomic excitation decay in resonators	A. G. Kofman and G. Kurizki	R3750
