

Erratum: The physics of magnetic fusion reactors [Rev. Mod. Phys. 66,1015 (1994)]

John Sheffield

The development of the ROTAMAK concept, see Sec. VII, was mistakenly attributed to Blevin and Thonemann, 1962. I am pleased to be able to correct this error and give the correct attribution, which is to I. R. Jones, "The ROTAMAK Concept," Flinders University Report No. FUPH-R-151, 1979 (NTIS-PB85-133858).

The reference to Fig. 48 on page 1041 should be to Fig. 44.

The term (R_a) in the denominator of Eq. (4.32) should be ($R/\bar{a}$).
